

ABSTRACT OF THE DISCLOSURE

A correction data output device according to the invention includes correction data outputting means for outputting correction data that corrects object frame data included in an inputted image signal on the basis of the mentioned object frame data and previous frame data, which are one frame period previous to the object frame data, and correction data correcting means for correcting correction data that corrects and outputs the correction data outputted from the mentioned correction data outputting means on the basis of the mentioned object frame data and the mentioned previous frame data.
